KILL AND ROB MINE OFFICIALS

GLEN ALUM TRAGEDY DEATH TOLL ELEVEN. WITH TWO OF SHERIFF'S POSSE WOUNDED

Eleven Lives Lost and Two Wounded in Bloody Battles Near Glen Alum, W. Va. One of the Most Horrible Tragedies in History of Mingo County.

nurder and robbery at Gien Alum, W. Va., was the following in the William-sen Dally News of Saturday, August 16th. The scene of the tragedy is on the N. & W. railway about 30 miles east of Williamson:

Dr. W. D. Amlek, company physician; F. D. Johnson, bookkeeper, and Joseph Shleler, electrician, of the Glen Alum Coal Company, were murdered by highwaymen just before

noon Friday.

This startling information reached here in shape of a message to Sheriff G. W. Hatfield, who immediately or-

ganized a posse and started to the April on a special train, placed at his disposal by N. & W. officials.

Walter Speed, the N. & W. agent at Glen Alum, telephoned to officials of the Glen Alum Coal Company, who were all Williamson attending court. were in Williamson attending court, that the bodies of the murdered men had been discovered by two traveling men who were waiking from the sta-tion toward the camp.

Other messages were received by-the officials of the company, but none of them gave further details. It was not stated whether the three victims had been shot or killed in some other

It was stated here that the amount of money secured by the highwaymen was in the neighborhood of \$10,000. The money was shipped on No. 15 from a Lynchburg bank and Dr. Amick, Johnson and Sbielor met the train to act as guards from the Glen Alum station to the coal camp, a dis-

tance of four miles. The murder occurred somewhere

It is also helleved that the assassins are employees of the Gien Alum company or had been employees at some tlme or other. No word reached here until press time that there was any real clue to their identity.

The assassins were doubtless ac-quainted with the Conditions at Glen Alum, for they chose a most auspicious time for their foul deed., General Superintendent Yost, Treasurer Fink and Hubert Butcher, special officer, Magistrale Howard Toler were all In Williamson attending court as witnesses, and until the 'arrival of the sheriff with his posse there was no one to organize pursuit.

It was stated that a stop would he made at Matewan to take on the bloodhounds owned by Al lleskins. These dogs are young but have shown vell on the trail.

Both Epiing and Burwell died on the

firing line, the bandits having first been run to their iair on a little stream known as the Spring Fork branch of Ben Creek.

In a natural foriress high up on the mountainside the bandits at first had all the advantage of their pursuers The first battle was fought about noon today when ten members of Sheriff Hatfield's posse, who had been hot on the trail all day first came within rifle range. A hundred or more shots were exchanged and after Mounts was weunded, the posse drew off to await reinforcements and to give flanking parties time to come up. The bandits also killed one of the blood hounds.

Epling, Burwell and a number of ther Baldwin-Feits men were first to come up after Mounts had been wounded. Brave and fearless, these two men with ethers following tempted te ascend the mountain, their plan helng to take the bandits by surprise if possible. The trees and underbrush did not afferd complete concealment and they were picked off by the handits, who are armed with high-power guns. The bodies of the two nen were recovered with great difficulty.

The two clashes served to identify three of the bandits, all of them young men and nativo Americans. They are alleged to be Harve Prater, Mel Samon and Young Bud Rutherford, allas Hurley. The identity of two others, supposed te be in the band, has not been learned. Two of them are sald to have criminal records and all have always been regarded as dangerous and desperate ion. About one year ago Prater killed his father and elder brother at their home on Knox Creek, but escaped punishment by pleading that he came to his father's rescue hen the elder brether assaulted him Samson has served a term in the penlterilary going up from this county on being convicted the second time for carrying a pistol. He had been out of prison about six menths. Rutherford's father, whose first name is also Bud Rutherford, was arrested this after-noon. As news of the battle spread, the men, probably five hun-dred in number, scattered about over several miles of territory and began to assemble around the lair of the bandlts. Before night fail it was entlrely surrounded. Judge Damren and saveral officers left for the scene this evening to prevent a lynching if possible. Sheriff Hatfield had been fully convinced all day that the men will never surrender. It was his plan to advance on the bandits from all sides

before dark to prevent, if possible, further loss of life. It was almost certain that another final battls will bs feught and news of it was expected here at any minute. Although rain the New Yerk office of the United poured in terrents, Sheriff Hatfield and Press from its Rome correspondent, his posse clung to the trail. So slow and dangerous was their progress that they covered a distance

of less than five miles. The bandits also met almost insurmeuntable difalso met almost insurmountable difficuities, but the sterm was in their

The cabls announcing his death was received at 2:26 p. m. The death of the Pope was due to the war. Hs died practically of a broken heart. For days before the war breke out he was deeply concerned and he netlified all heads of the church throughout Europe te work fer peace. Up until hestillties actually began, the Pepe did net believe that war could come between clvillzed nations at this late day. When he heard that Germany had declared war on Russia, and realized that the spark actually had been kindled he broke dewn. His Holiness sweoned and was uncenscious fer several minutes. Physicians were called in and had to minister powerful resteratives. There was a slight recovery and the Pepe was able to be about the Vatican. He spent mest of his time in prayer. When the Emperer of Austria asked

that he send his blessing to the Austrian forces, the Pope selemnly and sorrowfully sent word that he would bless all the combatants. That he considered sli of them his children. Finally, he issued an sppeal to every Catholic threughout the world to appeal for peace. This appeal was dis-tributed broadcast. As the news of the terrible fighting began to reach the

Vatican, the sorrow of the Pope be-came very great. He had long spells ef weeping, and would sit for hours at a time, murmuring prayers for the dying.
On Sunday he was too ill to leave his bed. The doctora in attendance were not alarmed at that. His sickness, which at that time helieved to be bronehial eatarrh coupled with gouty manifestations, would yield to treat-ment, but it did not. Yet while con-scious, he prayed incessantly. When

the doctors gave him liquid nourish-ment, he would shake his head in mild protest. It was plain he realized that he was very lll, but it was also plain those about him that the melancholy induced by the war was having certain that the cause of death be a broken heart. The spirit that had animated His Holiness in his pust battle with the illnesses which have at-tended him was absent this time, so today the members of his household prepared for the end.

AN ATTACK ON ILLITERACY.

In an effert to banish illiteracy from their borders a number of counties in Kentucky have decided to institute a moonlight school campaign.

The movement is being encouraged by the Kentucky Illiteracy Commission and the counties which have manifested their intention of part are Montgomery, Lincoln, Hurdin, Clny, McCreary, Mcreer, Grayson, Pike, Clinten, Leslie, Ksnton and Campbell. Some of them are rural countles while others contain cilles or tewns of considerable size. September 7 is the date that has been selected fer a concerted attack on illiteracy and by that time, it is to be hoped, other counties will be ready to take part.

Rowan, a mountain county, is the nemo of the moonlight school. suredly a method of operation which can bring about the practical hanishment of liliteracy from a mountain ceunty can be prosecuted successfully n other counties. A thousand meon light schoels in Kentucky under the direction of competent and conscientiens teachers would make a lasting impression on the State's illiteracy record and weuld raise Kentucky several points in the educational scals.

There are comparatively few persent who are illiterate as a matter of choice. Mest of the liliterates weuld welcome an epportunity to learn how to read and write. This was demenstrated in Ruwan county when men and women of advanced age, aoms of them in the ectegenarian class, gladly scame pupils in the moonlight scheols and diligently labored to throw off the burden of liliteracy. The people of Rowan differ in nowlae from the people wird inhabit other counties in the State and what has been done there can be done elsewhere.

The moonlight school movement is net impractical. On the contrary, It elimininting illiteracy that hus been devised. It can be made a succe any county where teachers and school officials will devote the necessary energy to lt.-Courler-Jouinal.

AUGUST TERM OF THE

LAWRENCE CIRCUIT COURT.

On Monday next the August term of the Lawrence Circuit Court, "Big Court," will begin. The civil decket holds very many cases, some of them quite important. The penal docket grows smaller every year and the probability is that it will take only a few days to finish it. This shows a much healthler moral condition of the county and is a hopeful sign. The fact is, there has been a rigid enforcement. is, there has been a rigid enforcement of the laws concerning the liquer traffic in this county and there has been a marked improvement in the merals and manners of the people. The use of intoxicants is "the direful spring of woes unnumbered," and the more the law hedges it about with difficulties the less of it will be consumed. Cierk Hewlett ssys the various court pro-cesses have been generally well served, and a busy term may be expected.

Washington, Aug. 17.-The reply of the French Premier to President Wil-sen's offer of mediation is not understood to be final at the State Dspartment ner indicating an indisposition en the part of the French Government to consider the reposal. It is con-strued enly as a polite acknowledge-ment of the offer and about what was

to be expected at this time.

The Administration did net expect that medistlon would be considered in the first heat of conflict and before any great or decisive battles had been fought. The offer was made simply te remind the participants in the war that the United States stands ready to act without discrimination in the effort to hring about peace when the time is ripe.

This view was set forth clearly by Secretary Bryan in a recent comment upon the President's mediation offer.

Willing to Listen.

"It may be some time before the na-tions engaged in the European war will be willing to listen to any suggestion of mediation," he said, "but the Presldent, in tendering the good offices of the Government at this time, has measured up to the respensibilities of ths nation and to the expectations of

Intelligent, fair-minded men every-where in the United States are every day shaking hands with themselves in self-congratulation over the fact that the country is blessed with a President like Woodrow Wilson. A few penny whistles in the shape of a lot of thumb papers erroneously called newspapers, having nothing slse to do are doing their level worst to create a panic and are howling with rage because the calamity doesn't come. Every passing hour of these days of anxious eare President Wilson shows himself to he the man for any emergency which may arise. May the good Lord preserve his life!

For years the German emperor has figurately, heen strutting shout with a chip on " should a day a sound of body wanted knock it off. Nobody wanted to fight, and when a crazy Servish student assassinated an Austrish prince the Kaiser seized upon the deed as a pretext for an affray. He has plunged nearly all Europe into a war which will devastate the country and drench the land with blood. He deserves a good licking, which he will probably get at the expense of billions of treasure and millions of lives.

The official returns from the State primary are in and are significant. The Democratic vote cast for the long Senatorial term aggregated 158,805, showing for the first experiment a wide public interest in the popular election of a Senator. The Republicans for the same office cast 50,235, and the Progressives but 3,968. Cer-tainly this indicates that Kentucky is a Democratic State by a majority so strong that it cannot be shaken.

A British expeditionary force numbering, more than 100,000 has made a safe landing at Fronch and Belgian ports and is doubtless well on its way to form a junction with its sliles. This Invading force is the flower of the British army, and the action is a masterplece of strategy on part of England. The troops were given enthusiastic welcome.

The President's "price of foodstuffs" letter to the Attorney General is brief, plain and to the point. Those who rould speculate on the misfortunes of the people and place a hurden upon their fellow citizens will perhaps find that those they seek to burden are not entirely friendiess.

Congressional investigation charges that the Standard Oil Comls restraining trade in various oil fields was proposed in a resolution Introduced in the Senate by Senator Chilton, of West Virginia.

Representative Barkley, of Kentucky, made an optimistic speech to the conference of men from the Ohio River Valley meeting in Washington urge the early passage of the Rivers and Harbors Bill.

For a new man in Kentucky politics Senator Camden certainly made a remarkable race. He is in a position to of great service to his adopted State, and is no doubt entering upon a useful and honorable career.

Mrs. Woodrow Wilson was the sec ond wife of a President of the United States to die in the White House, Mrs. Russell Harrison being the first.

CALL FOR VOLUNTEERS ...

While European countries are calilng for volunteers in a conflict of war, Kentucky is calling for volunteers in conflict of peace, a conflict which, it intually and successfully waked, will insure to the people of this great Commonwealth a new era of peace, happi-ness and prosperity. Kentucky has one blight and blot upon her record at this time, and that is the high percentage of iiilteracy among her adult population. 208,084 of her msn and en cannot read or write, and are thus deprived of the privileges of cit-izenship and prevented from enjoying the richest blessings of life. A WAR OF MISCALCULATIONS.

A special correspondent of the New York Times at Berlin, Frederick W Willie, now writing from London terms the "Elan" of the Germans miscalculation, and one cause nation wide gnashing of teeth when the gravity of the misealculations is popularly understood. Mr Willie particularizes as follows:

"At present the Germans are hopein the dark. Drunk with selfconfidence, they are being dragged deeper and deeper into the uncertain-ties of a world war in the belief that the sword has been forced into the

Kaiser's hand. "Germany's misealculations have heen both political and military. They began with the eocksure supposition that the Triple Entente would not withstand the shock of war. France was held to be unready. Russin was looked upon as on the brink of revolution, both political and industrial. England was thought to be preceeupied with Ulster and disinclined, in any circumstances, to risk anything in n great Continental struggle not directiy nffecting her. Italy's heip was regarded as a foregone conclusion.
"The idea of the Belgians' resistance

to Germany's temporary invasion was hardly considered. That Beigium could offer military opposition worthy of Plevna never entered Berlin's mind.

merican sympathy was absolutely counted upon. Its absence is the cruelest disappointment the Kaiser's Govrnment has so far suffered.

"Its miscalculations in regard to England were perhaps the greatest of all. It scouted the thought of an Engiish army, or the idea that a Kitchener might suddenly be placed in charge of t. The Germans have been educated by their political professors to believe that a great European war involving Great Britain meant the independence of Canadn, Austria and South Africa, and revolutions in India and Egypt,' Commenting upon this remarkable

leclaration the Courier-Journal says:
"It is inconceivable in America that Germans could look forward to rebellion in South Africa, Canada or Australia as a result of an attack upon Great Britain. No political conditions in either of the three dependencies give ground for such views. India and Egypt might make advantage of any seemingly good opportunity to rebel, but it is not altogether certain that India would. Many thinking Indians have desired autonomy, such as Australia has, rather than separation from the British Empire. The "Pax Britannica" is respected by Indian princes who are still in possession of their thrones as a har to Indis's returning to the condition of a cock pit, in which England found it.

"It is inconceivable in America that Germans of the better informed elasses' could have believed that American sympathy would have been with any European nation seemingly aggressor in a great European war. The other miscalculations might have been more easily, and reasonably, made, with the exception of that with regard to the irish question keeping open a split between British after a declaration of Germany's purposes. Anyone must have known that a movement against the United Kingdom by a Continental Power would unify the British upon the instant."

MEXICAN WAR BARELY MISSED. Washington, Aug. 18.-Just how close the United States came to being involved in a war with Mexico as recently as a fortnight ago was revealed today hy some high officials of the

Administration. When Gen. Carranza abruptly rejected the overtures of the peace envoys sent by Provisional President Carhajal, and at the same time ignored the diplomatic efforts of the American Government to ring a peaceful entry of the Constitutionalists into Mexico City, drastic measures were urged up-

on President Wilson. Many memhers of the Cabinet-it is said a majority—argued in favor of sending American troops from Vera Cruz to the Mexican capital to prevent the anarchy that was then expected to follow from the failure of the Carbajal Government and the Constitutionalists

o reach an sgreement. President Wilson, however, firmly resisted ali pressure, arguing that the sending of American troops to Mexico City, even on a mission of order, would probably mean war with the approach ing Constitutionalists.

relative of Sheriff Hatfleid, had been killed, but later reports showed that Hatfield fell, felgning lnjury to get the bandits to expose themselves to fire of the posse, or encourage them to flee. The firing became general and hundreds of shots were fired. Two hours later an attempt was made to rush the bundits from their aimost impregna-bie position but the attempt falled and Detective Burrell was shot and ln-stantly killed by the bandits.

Detective A. M. Wade was des-pntehed to War Eagle, five miles away, to secure reinforcements and as soon as the word came that the men were their ritles and hurried to the seene.

The latest and last information concerning the Gien Alum tragedy is the

following from Williamson: Williamson, W. Va., Aug. 17.-Although hundreds have viewed the bodies of the ilve bandits killed by Sher-Hatfield's posse in the mountains buck of War Eagle, little information has been gleaned today thut would lead to their identity.

Gien Alum officiuis are positive that wo of them have been seen there a number of times, but they were not

It is believed that these two, were nembers of a "Black Hand" society and that they went to Eikirorn and se eured assistance of three more members of the same organization.

The theory is today advanced that

one from Gien Alum and one from Eikhorn killed Amick, Johnson and Sheltou, while the others awaited their coming to War Eagle mountain, it bebandits intention to mingie with Italians in the War Eagle camp

This plan was frustrated heenus the alarm was given so quickly that a big posse was out along War Eagle creek compeliing the bundles to turn toward Spring Fork of Ben Creek. All those, who followed the trail to Ben Creek, and up to War Eagle mountain say that there were but two.

A recount of the money this ofternoon leaves hut thirty doliars missing. Much of it was blood soaked. Ali but n few of the blils had been issued by the Fifth-Third National Bank of Cincinnati, and were new.

GREAT FIGHT UNDER WAY ALONG VAST BATTLE LINE.

London, Aug. - 19 .- The curt announcement in a telegram from Brusseis dated last night of fierce fighting between Belgian and German troops along an extended front is generally accepted in London today as Indicating the reul beginning of the first great hattle in the war.

The German sttack is today again reported mude on the direct orders of Emporer William himself to his genersls in the fleid.

The exact extent of the line of the fighting has not yet been revealed but presumably it stretches in a north and south line. Beyond this its definite iocation is virtually guess work.

Refugees from Diest, Tirlemont and other towns in that section of Belgium who fled as the Germans approached, are coming into Brussels in great num They deciare that since the lnhabitants vacated Tirlemont German shells have been dropping in the town and that subsequently the Belgians hroke the German advance there at the point of the bayonet.

THE BUSY COUNTY AGENT.

Mr. Kegiey has been husy in various parts of the county, holding talks on topics and giving wifiing ilsteners the beaefit of his practical knowledge. He is a good man to listen to if you are at all interested in whut to raise on your farm and garden and how to get the best results.

He spoke to the NEWS of the ex-

gurden of Reuhen near Tuanel Siding. He said ta sub-stance that it was an object lesson in gardening, showing what intelligent well directed effort would do on Big Sandy soil. Mr. Wellman toiled early and late, of course, but he made his garden bring him fine resuits

The agent wanted the NEWS to lay emphasis on the crimson clover idea by urging the farmers to begin at once the sowing of the seed. It is just the right time and the right weather for it desired quantity at Snyder Bros. Those who bought when first urged to do so have saved money. The seed is im-ported from Germany, and this telis the unwelcome story of its advance in price. But It's worth the money.

A large quantity of ground lime-stone, ordered by a community of buyers, will be here shortly and will be found on the switch at the mili Speaking of limestone and its use on ground, the following paragraphs may not be uninteresting:

"Acid is produced in soils as the natural result of the decay of organic matter. Unless there is sufficient lime present in the soil to neutralize the icid ns lt forms, it will accumulate and produce an acid soil. The lack of lime in the soil may then be considered the real cause of the acidlty which develops. This lack of lime in some soils is brought about by leachlug, by cropping, and by the absence of lime in the rock from which the soli was formed.

"Practically all the loss of lime from the soil is caused by leaching. In the formation of soil from rocks, the soil aiways acquires lime. Whenever the ralnfaii is sufficient, the lime is generaily washed out of the soil into then, does not accumulate in soils in humid areas, but in regions of little rainfail it does collect and so is present to neutralize any acidity which may exist."

MEN'S MEETING.

The men of the J. W. Jones class in the Sunday School of the M. E. Church South had full charge of the services last Sunday evening. Judge T. S. Thompson, president of the class, was the chalrman of the meeting, and presided with as much ease and dignity as he ever did on the judicial bench.

The general subject for discussion Triumphal Entry into Jerusalem." The topics discussed in five minute speeches were: "Christ's Entrance Into the Business, Political, Educational, Religious and Home Llfe." The respectlve speakers were W. D. O'Neal, L. S. Johnson, A. L. Burton, H. C. Suliivan, A. O. Carter and M. E. Haywood, Each one made an interesting and a helpful tnik. The class furnished the music and it was an inspiration to hear them

Up to Parents to See That Boys and Girls Attend Church

O TO CHURCH!

JE SIX.

The trouble with some of our churches nowadays is that they haven't the support of the young people. Churches lost ambition filled with grandfathers and grandmothers, but they lack the endance of the young people.

> NONE WILL DENY THAT IT IS DESIRABLE THAT OLD PER-SONS ATTEND CHURCH. BUT THE CHURCH IS NOT SOLELY FOR PEOPLE ADVANCED IN YEARS. THE CHURCH WANTS THE YOUNG PEOPLE, PARTICULARLY THE YOUNG MEN. IS THERE ANYTHING MORE MANLY OR INSPIRING THAN THE SIGHT OF A YOUTH WHO NEVER FAILS IN HIS ATTENDANCE AT CHURCH? THE GIRL WHO PICKS OUT THIS YOUNG MAN FOR A HUSBAND IS NOT MAKING A MISTAKE. HE WILL NOT DEPART FAR FROM" THE PATH OF RIGHTEOUSNESS. AND THE SAME APPLIES TO THE YOUTH WHO IS SEEKING A LIFE PARTNER. THE GIRL HE MEETS IN CHURCH, THE GIRL WHO SINGS IN THE CHOIR, IS THE GIRL WHO DESERVES AND GEN-ERALLY GETS THE BEST HUSBAND.

Parents, it is up to you to see that your boys and girls GO TO CHURCH. You are responsible for them and their conduct. If your boy or girl sulks at GOING TO CHURCH be firm. It is no time for indulgence. Have your child JOIN ONE OF THE CHURCH SOCIETIES. The mind of the young boy or girl is easily influenced for good or evil. The words of the preacher will make an impression. GOING TO CHURCH by the young makes for better men and women. The lessons they learn will stand by them in the battle of life.

Every boy and girl should GO TO CHURCH next Sunday! They should GO EVERY SUNDAY!

Young people can do wonders in this splendid GO TO CHURCH movement!

LETTER FROM OKLAHOMA.

Mnrshail, Okln., Aug. 10th. Editor Big Sandy News :-

Your paper comes to me every weel and I note in last week's paper what 'Mountaineer" says ahout your paper which causes you to say in heavy head lines "We blush as we bow." I have a time convincing some Blue Grass and Bowling Green people as well as others who have read "The Trail of the Lonesome Pine" and other feud stories. I quote what you say relative to the coal, oii, gas, timber, cake ovens, etc. and convince many of the wonderful growth and development of of that country. I tell them if father had held onto his farm at Mouth of John's Creek and Beaver Creek his family would have been well off, but of course no one knew of the wonder-

ul wealth underneath the ground. I left Sandy Valley when 20 years of age in 1869. Came to Kansas July 24, 1869. Stopped with a cousin who came from Kentucky and was then living on John Cniebo place, the owner of which was a Shawnee Indian. I had heard of Tecumseh and his brother the Prophets doings at Tippacanoe and ali along the Ohio river and while it was hot weather in July, I would almost have a congestive chill at night fenring these Shawnee Indians might make with them later on when I attended a campmeeting near Kansas City at acquainted with Jonathan Gore, a white Kentuckian and a lawyer, who married I married in Kansas and have lived in

Cheyennes and Arrapahoe Indians were the bad plains Indians and I think I have calouses on my eibow as I used to, along with others, rear up on right elbow, shade our eyes with other hand and watch for Indians. They murdered some people just a few miles from us on Big Muddy and we heard of it where we camped at Johnny Red-"Why did you bring these tenderfeet out here when you know the Cheyennes are on the warpath? WEBBVILLE.

The Grand Castle of the Knights of he Golden Eagle met here in the K. G. E. hnii Tuesday, Aug. 11th, and was called to order by Grand Chief Christian Cline, of Commonwealth Castle No 6, of Covington, Ky. All officers and delegates were present except the delegate from Bolts Fork Castie No. 8.

The session was a short but very interesting one which closed at 11:30 p. m. on the same day, as most of the delegation were working men and as the factories now are running on full time, some of them double time, they were rushed to get back to their jobs, and we were therefore so awfuily hard pressed for time that we were compeiled to cut the session short.

After the routine of business was Coal, of Maysville, Ky., acting as Den-uty Supreme Chief, assisted by Past Grand Chief Alex Simpson installed as Grand Chief officers for the ensuing term as follows: Christian Clinc, of Commonwealth Castle, Covington, Past Enterprise Custie, Grand Chief; Bro. KENTUCKY CROP REPORT. August 10, 1914.

The crop report as of August 1st is the most discouraging one that has been issued from this department for many sessons. The report issued last month, while dismal in many respects, had a hopeful undertone, as seasonable rains could then have saved the crops more or less. There has not been a general rain in the last month. Insuf-ficient showers have fallen in different localities and conditions have deteri-orated in practically every portion of the State. It is now too late for the rains to do carly corn any good whatever. The corn that was planted after June 1st would be materially wided by a good rainfall. Tobacco will come out with unything like a good rain, and the dnmage has not been so serious to the tobacco erop as to the corn crop. Pastures have dried up and stock water is very scarce in many places. The lack of good drinking water has seemed to injure stock more than the lack of pasture.

Corn has dropped from a condition of \$1 per cent to 65 per cent, Burley tobacco from 65 per cent to 56 per cent. Dark totacco from a condition of 67 per cent to 62 per cent. Clover pastures are disappearing, showing a con-dition of 55 per cent. Biuegrass 64 per cent and alfalfa 65. Cow peas and oy beans are resisting the drought better than any other of the forage crops Again we would like to call attention to the possibilitles of these two legumes and the farmer who has sowed u fev acres of either of these plants in all probability will have hay for the win-ter, as well as improving his innd. Fruits are dropping off the trees on account of the drought conditions. The condition of apples is given at 62 per cent, pears at 66 and peaches at 75 stock conditions are given: Horses 92 per cent, cattle 89, hogs 83, and sheep 89 per cent. Pouitry as a rule is doing weil. Garden conditions are given nt 51 per cent.

While rnln would not do the corn crop any good, yet it would be of great nuturing forage crops. There has been out little summer plowing done on account of the ground being too much packed to break up in good condition: Farmers are urged to sow rye, barley or wheat as early as possible in order o have winter pastures. Winter or Halry Vetch is fust becoming an importnnt part of our winter pastures. This is a leguminous pant and can be own with rye, and will make hny early in the spring if this mixture is cut before the rye heads.

Great care should be exercised prevent fires spreading in the fleids. The forests are becoming dry enough for fire to spread rapidly if once light-The water supply of several towns has become so low that the health authorities are warning the farmers as weil as the city dweiiers of the danger of using water from stagnant wells or poois or from iow springs. Two dry seasons in succession have rendered conditions very unpromising from an agricultural standpoint in Kentucky, and just at the time when prices are alghest for live stock known in many cears, the Kentucky farmer is nunbie to keep his farm well stocked on account of the drought conditions. He, lowever, will be well repaid who manages to hold on to his breeding stock inder these conditions.

Very truly yours, Commissioner of Agriculture.

THE SEPTEMBER WOMAN'S HOME COMPANION

The September Winan's Home Companion is a "Fashion Forecast Num-ber." Grace Margaret Gould, the fashion editor, with the assistance of her staff of writers and artists, presents the fashion news in a practical way so that readers can foliow up her suggestions and make defluite use of them. In a general way her policy is of the latest fashions without extravagance. An interesting feature of this month's fashion department is a coiored piate of an afternoon gown designed by Madame Paquin for the conservative American woman. The gown is reproduced from Madame Paquin's design by Henry Hutt and is done in full color.

Another strong feature of the September issue is the tirst of a series of articles reporting u minister's experiences with women. The first article is entitled "The Woman Who Came in the Night." It is an account of a woman who went to her paster when sho was in serious trouble, and the story reveals the immense bility and opportunities of ministers for service in their communities. Another interesting articles is an account what has been done at Freihurg, Germnny, toward mnking painiess childbirth possible by the use of two drugs which are not injurious. Other special articles are: "What Is Youth?-What After Youth?" by Raiph Waldo Trine; "Better Bables," hy Anna Steese Richardson; and "Capitalizing Common Sense," by Edmund Stover.

Fiction is contributed by Mary Stewart Cutting, Frederick M. Smith, Fannle Hensiin Lea, Florence Edwards Trevor, Mary Heaton Vorse, and Margarita Spaiding Gerry.

The regular Young People's, Tower Room, About People, Handicraft, and Household departments are full of new ideas and suggestions entertainingly

Our Advice to the Boys.

Boys, did you ever know, or can you call to mind a single person, who, having his own way to make in the world spent his time in the streets, in billiard saloons, around hotels, or in any form of dissipation or idienoss, to succeed in life in an eminent degree in any enterprise? Look over your list of friends and acquaintances and note their course. Do you not find on examina-tion that those who today are men of influence and honor, were the youths who made the most of their valuable time, turning it to good necount? And on the other hand do you not find those who stood on the corners with a cigar or pipe in their mouth, went from bad to worse, from worse to ruln? Sadly must the answer be made-they have falled. Will you not profit by their example? Flx your eyes on some noble object-be a man.

Personalities.

Keep clear of personalities in gerera conversation. Talk of things, objects thoughts. The smallest minds occupy thomselves with personalities. Person-alities must sometimes be talked, be-cause we have to learn and find out cause we have to learn and find out mn's characteristics for legitimate objects; but it is to be with confidential persons. Do not needlessly report ill of others. There are family boards where a constant process of depreciating, assigning motives, and cutting up of character goes forward. They are no pleasant places. One who is healthy does not wish to dine at a dissective. does not wish to dino at a dissecting table. There is evil enough in man. God knows; but it is not the mission of every young man or woman to detail and report it. Keep the atmosphere as pure as possible, and fragrant with gentieness and charity.

Is not the happiest man or woman the most successful in the highest sense of the word? Given the com-forts of life, is anything more desir-able than the sunshine of a happy

homs, where a loving wife and merry, happy children abide, and where friends congregate for cheerful, in-spiring association? Industry and temperance and courage will bring to any man the comforts of life. Add to this a kind heart and a generous, tactful consideration toward all men and life

The busy men and women of the world are they who have sttained to greatness. Many such have endured hardships and practiced rigid economy to enable them to meet the demands large family and the greatest men this country has produced have been msn who have labored with hands and brain, after acquiring a competency, remembering the years that are gone, admit that their working years were their happiest years.

"Catch the sunshine, don't be grieving," is the way the song of our child-hood runs, and we have found it much better to sing in our boul than to grieve in our hearts. HOUSTON DISCUSSES EFFECT OF WAR ON AGRICULTURE.

day for the first time by Secretary Houston, who pointed out that the United States was practically the only large food producing country undis-

turbed.
"If Germsny and Austria cannot control the high seas," he said, "it will be very difficult for food supplies from this country to reach them. This would not have a very serious effect on our exports, because a very small proportion is taken by these countries. Of the wheat and wheat flour exported in 1913-about 140,000,000 busheis-only 12,000,000 went to Germany and Austria. If they were to control the high seas it would scriously interfere with the marketing of the greater part of the foodstuffs ws export.

"If, on the other hand, England, France and Russia, control the high cumstances. seas, we should be able to market in the near future without great difficulty tensive shore lines and large shipping facilities they would doubtiess secure a very considerable part of what they

cotton, corn, wheat and msat products constituted the largest proportion of department's statistics of production and exports of corn showed a decrease of over 600,000,000 bushels in 1913 from 1912, and added: "it does not seem to me likely that we are going to have a very inrge amount of corn to export.

Importations of eorn the past year exceeded exports by nearly 2,000,000 hushels, and with the crop for the present year 500,000,000 hushels less than that of 1912, Mr. Houston thinks it probable that this country could consume it all without much reduction in price, if any. The demand from abroad for corn for food is expected to

help to maintain the present prices.
"This season," said the Secretary, 'hus a resuit of which there undouht ediy is some shortage, now estimated nt approximately 300,000,000 hushels. This shortage may be further increased by destruction of the crops or failare to harvest them through the diversion of laborers into the army. Ali these factors will tend to increase the demnnd abroad for American whent and strengthen prices. if there is an increased foreign demand for wheat we can certainly supply it, but car

"Omitting the ships plying to Orient and to the South, and taking into account only the ships that clear for Europo from the United States, we know that in 1912 the tonnage of merchant vessels was 17,727,000 tons. Of that 17,000,000 tons, 2,900,000 tons bslong to neutral countries and 10,800, 000 to England, France or Russia, Only 3,300,000 belong to Germany and Aus

Must Have Food.

"if these countries want foodstuffs from this country (and this is one of the few countries from which they get them, because it is one of the few large food-producing countries at present undisturbed), they will not depend exclusively upon shipping customarily clearing from this country. They will regard rood just as much military necessity as arms or smmuni-tion and they will be just ns desirous or getting it. 'Armies fight on their beliles.'

"The total merchant tonnage of the world is 45,800,000, of which 17,371,000 belongs to neutral countries and 23,-029,000 to England, France and Russia, leaving, 5, 500,000 in round numbers belonging to Germany and Austria. England alone does about 50 per cent

of the carrying trads.
"If Congress takes promptly of the present situation and enacts legislation for the enlargement of the merchant marine under the American flag, not only would great tomporary reilef be afforded, but a permanent advance would be made.

"The greatest problem," said the Secretary, "is the cotton situation. Many factories in France are in the war zone. Russia will be affected, and if Engiand can get the cotton and market lt, there is no special reason why she should not continue her manifacturing on a considerable scale, I do not see how any disturbancs will come to the English manufacturers as far as inbor is concerned. The neutral countries, Italy, Japan, Spain and the United States, will seek to increase output and find larger amounts.

"Making every allowance, it seems likely there will be difficulty in disposing of at least from 3,000,000 to 4,-00,000 buies of cotton. Probably considerable local relief can be afforded the producers of cotton. It remains to e considered whether the Government through the Trensury acting under the Aldrich-Vreeiand act, or whether the Federal Reserve Board can furnish relief. If they can do so, adequate busness arrangements can be made."

PUBLISHERS WILL NOT DELIVER SCHOOL BOOKS.

Frankfort, Ky., Aug. 14.-The refusal of text book publishers under the State contract of 1914 to deliver books In some instances to local dealers elected by county boards of education, and refusals to accept in exchange old text books not in good condition, have thrown the rural schools into chaos, according to State Superintendent Hamlett, who wired twenty-one coneerns this morning that he had advised with the Attorney Genoral and would lay before him information on which to forfeit the bonds of the publishers.

He at once decided that iegai action should be taken if possible, and that if there wers no agricultural exports. He said that his inw covering the question new legislation should be passed.

Officials said the President considered that in many cases the Increases were wholly unjustifiable. When he returned from Mrs. Wilson's hurisl at Rome, Ga., resolutions already had been introduced in the House calling on the Department of Jutice to report what action they were taking, President Wilson's Interest in the situation, however, was wholly apart from that, and he probably would have taken action before had it not been for the death in the White House.

Special agents of the Department of Justice throughout the country and investigators of the Department of Commerce are available to collect cyldence for any action the Attorney General may think warranted. The Department of Labor also has a corps which has become very expert in gathering evidence of the increased cost of ilv-

Washington, August 14.—The move-ment of the Federal government to investigate increases in food prices with a view to possible criminal prosecution was under full headway today.

Attorney Generni McReynolds has send to every United States District Attorney this circular:
"The Department by its special

agents in various parts of the country has instituted an investigation into the marked increases in the prices of foodstuffs since the outbreak of the European war with a view of ascertaining whether the increases are due to any combination or combinations ln estraint of trade or other uniawful action. Please co-operate by communieating to the department any information which you can obtain on the subject, together with your opinion in respect of the appropriate action to be taken"

The responses are aiready beginning to come in on the department from the eiegraphic notice of thess instructions. The department has been inquiring or several months into the question of increased prices prior to the European war. It has had under way an inquiry into the increase in the cost of meats, with special reference to the Argsntine situation; the increased cost of eggs, sugar, canteloupes and other

THE PERAMBULATING SHOWCASE (By Herbert Kaufman.)

The newspaper is a huge shop window, carried about the town and deilvered regularly into thousands of homes, to be examined at the leisure of the reader. This shop window is unlike the actual plat glass showcase only in one respect—it makes display of descriptions instead of articles.

WILSON AGAINST LOAD FOR EUROPEAN

Washington, August 13.-President Wilson was confronted today with the problem of whether American bankers shall be permitted to float loans in the United States for any of the countries

engaged in the European war. Though the President has not reached a final decision, he is strongly opposed to the idsa. The question arose through the desire of J. P. Morgan & Co. to float a loan of several hundred million dollars for the French Government. Inquiry was made of the State Department by the Morgan firm as to whether the flotation of such a loan would be regarded as a violation of neutrality. Secretary Bryan discussed the subject with the President, who is studying it carefully before returning a finai answer.

derstood another New York banking house of prominence is desirous of floating a losn for Austria, but the State Department has not yet been approached, so far as could be learned tonight, with any formal inquiry as to questions of neutrality involved.

While there is no provision in ths American neutrality statutes against the loaning of money to foreign nations and no international agreement sxists forbidding it as a violation of neutrality, the President's judgment is that if it were permitted serious mis-understanding might ensue in Europe as to the resl attitude of the American Government and people toward the different nations in the present struggie. A loan was floated for Japan during the Russo-Japanese War, but, notwithstanding the precedent, it is President Wilson's belief that the influence of the American Government ought to be exerted so far as possible toward reducing the length of the strife rather than adding elements for its proiongation. He is likewise op-posed to the sending of largo quantities of gold from the United States at a time when domestic financial needs are paramount.

The possibility of stirring up ili feeling among the numerous bodies of citizens in the United States of particular sympathies in the European war is also regarded by the President as a potent reason for discouraging the floating of loans. By preserving strict neutrality to the letter, he believes the position of the United States wili be most secure in the present emergency and less likely to leave lil effects after the war is over

"HALF THE WORLD AT WAR."

At least one-half of the world is at war, seconding to a writer for the New York Press whose bent for statistics leads him to figure the dimensions of the present conflict in point of the popuintion of the countries involved.

"Roughly, there are about 56,000,000 square miles of the world's land area. "The countries now directly invoived In the war hold these areas and populations: British Empire

13,523,712 435,000,000 8,647,657 166,250,000 Russian Empire France and colonles 4,372,000 83,850,000 1,243,866 80,000,000 German Empire Beigium and Congo 911.000 28.000.000

Free State 261,099 51,340,000 Austria 23,661 4,000,000 28,982,996 898,440,000 "Whitaker's London Almanack estinates the world's population in 1912 at

just a little more than half the world's population as they also do of its area." These figures include in the German Empire 1,000,000 square miles of African territory. The continent of Africa is almost wholiy included mapping of the world that will follow the European struggle. Half of the world, from one point of view, is at war. But the geographical limits of the war upon land can hardly be exoected to include more territory than that which lies within the boundaries of the United States. The theater of the actual fighting will be, of course, very much smailer.

WHAT THE "WHITE BOOK" IS. The German "Whits Book" in

which an effort is made to give Germany and the Kaiser the credit for having tried to avert the war is plausble enough. But the mere fact that It was considered exigent to issus it in order to set Germany and her "War Lord" right before the world indicates uneasiness of mind in Germany us to responsibility for the disaster. The record is that Germany ls charged with having made a local far general and is upon the defensive ln the court of public opinion. The other side has not been heard, and will probably not be, as the Russians are not much given to explaining themselves and inviting endorsement.

PIKE COUNTY NEWS was only has been shooting.

joint aid of West Virginia officials, for the city of Pikeville. It will contain alleged bootleggers and illien dealere who were said to have been interfering with the enforcement of prohibition in West Virginia by their operations from across the border line in Pike county. This search was in-stituted in answer to complaints from West Virginia people that illicit whiskey business was helng earried on in South Williamson, a part of the little town on the Kentucky side that is the county seat of Mingo county, W. and at other points along the border.

The Kentucky officials left here two weeks ago intending to make their investigations along the fronticr line rom Williamaon to Warneliffe, 25 niles above. At Williamson Circuit to Warneliffe, 25 Judge James Damron mct the Kentucky delegation and assured them of every possible aid in their search, and his direction the investigation at South Williamson was immediately taken up. Sheriff Greenway Hatfield, of Mingo county also furnished a deputy, and after examining several citiof that locality under oath the wild rumors were found to have been absolutely groundless.

The same 'results met the investigators of both States all along their route to Warneliffe, the home of Robt. skirk, prominent whiskey man of Mingo county; and the nearest point to that place at which whiskey could procured was at Buskirk's saloon just across the State line in Virginia.

This is regarded by officials of both States as most positive proof that the prohibition laws of West Virginia are ing observed by both the people of that State and the people of Pike. county, Ky. And to secure the en-forcement of this respect in the future, Sheriff Mullins, of this county, has nine deputies scattered along the border line between the two states who her forms of infraction of the law.

CONCRETE PRISON.

Pike county is now building what ay safely be called the strongest rison in the State of Kentucky. This rison is located next door to the ourt house in Pikeville, and its grim wails, with grated windows inset, have peen finished. These walls are of reinforced concrete, and the floors and celling of the prison are of the same material, making what may be termed a solid concrete and metal building, from which it will be well nigh imhalble for a prisoner to break forth. The prison will contain two stories, thick concrete floor and ceiling for each, and heavy window gratings set in the concrete. Each floor will have a double row of cells and shower baths, with a corridor running entirely the rows of cells, with separate wards with it have recovered, ind all traces last, returned to their home in Ash-

BUILDING IS ACTIVE.

Pikeville has not in years experience ed a greater period of constructive activity than the preacut. Many old bulldings are being removed to give place to new ones, and other apjendid business and residence houses are going up on vacant ground. New additions to the city are being opened up, and two new streets will be added as soon as they can be opened and graded, the one being the extension of Kentucky avenue and High street to the top of Huffman Heights, and the other a new strect to be graded round the front of Cemetery IIII, to be called Sycamore street.

MORRIS TO BUILD.

Morell Morris, manager for the Pikeville Wholesale Grocery Co., is preparing to build a handsome two story pressed brick residence on his lot at corner Scott avenue and Third street, which will cost about \$6,500 and W. T. Curnutt, a local builder, recelved the contract for its construction last Monday.

The building will have an asbesto roof, copper gutters and portico 83 feet in length running round the build-Mr. Curnutt expected to begin this week with the excavation work.

PAINTSVILLE VISITORS.

BOY SCOUTS BUSY.

During the past summer the Boy Scouts of Pikeville have taken several long hikes into the country, and two of these were made during the week past, under the leadership of Rev. C. A. Dugger, of the Presbyterian Church. The club is now growing very fnat, and new members are being added almost every week. The well wooded country surrounding Pikeville affords them every opportunity for development including material for study. This is one of the livellest Scout Clubs In the State of Kentucky.

COLD STORAGE PLANT OPENS.

The new cold storage plant erected on Second street by James Hatcher, owner of the Pike hotel here, also of large timber, mineral and land interests in the Sandy Valley, has just been completed, and the first product was from the Ice cream department made In six minutes.

The plant is equipped with an Emery Thompson Brine ice cream machine, with a capacity of 60 gailons per hour, and has two 4-ton Jack Frost refrigerating muchines. The second floor of the building will be used as a flat, and the first will contain a meat market and seven refrigerated rooms ranging in temperature from 34 degrees down to zero. The management plans to be able to supply the entire upper Sandy Valley with meat, fruits,

ets. Mr. Hatcher is also planning to establish a dniry to be operated in con-nection with his cold storage plant, the product of which will be consumed principally by the cold storage plant and hotel. One hundred selected cows on his form at Ivel, Ky., will supply the milk, and later this may be converted into a general city dairy to supply Pikeville, and perhaps also Prestonsburg.

OLD SCHOOLHOUSE DEMOLISHED.

To prepare the ground for the magnificent new public and high school building that will rise on the school property on Fourth street, the con-tractors began to tear the old structure Monday morning, and by the close of the week the ground will be cleared ready for excavation.

The new school building will contain fourteen large rooms and auditorlum, and will cost nearly \$40,000, exciusive of the ground upon which it will be built. O. P. Raymond, of Cynthiana, has the contract, and he hopes to begin the construction work next week and finish by January 15th.

During this period there will be no city public or high school held at Pike-

SHOOTING AT POND CREEK.

A shooting occurred at Pond Creek last Sunday in which Thomps Charles was shot through the leg by Alhert Runyon. PIKEVILLE'S NEW SCHOOL BUILDING.

No Common School building in Kentucky will eclipse the one for which contracts have been let to be constructed in Pikeville. The building, a fair representation of which may be found in the above picture of the architect's design, is to be 145 feet lung, 80 feet wide and 40 feet high, with 16 rooms 27x32 feet in size. The contractors are O. P. Raymond Construction Company, Cynthiana, Ky., \$31,000.00; Heating and Ventilating Company, Celumbus, O., \$5,600,00: Paintsville Plumbing Co., Paintsville, Ky., \$1,605.00, Terra cotta work was awarded to an Ohlo firm at \$2,600.00, thus the total cost of the contracts are \$41,165.00.

The contracts were let, we are informed, at a saving of \$21,000 as compared to the highest hidders.

It will require 800,000 bricks to construct this modern—school—huilding,

which when completed, should be the pride of Pikeville and the whole of Too much praise can not be given those who were active in bringing

about the building of this much needed place of learning, and we hope to see on early completion of the building, Upon such buildings and institutions of learning scattered throughout Eastern Kentucky depends much of the success and development of this part of the State, for we must educate the children as a safe guard to peace,

prospertly and christianity.

The old buildings just torn down did duty for 20 years, and it it hoped that the new one will do for 100 years to come

The readers of this paper will be pleased to learn that there is at least one dreaded disease that selence has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and muceus surfaces of the system, thereby destroying the foundation of the disease, and giving the potient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much fuith in its curative powers that they offer One llundred Doliars for any case that it falls to cure. Send for list of testimoninis.
